
We dare not say “this is Africa” instead we challenge “what is Africa?”

The world sees Africa as the dark continent. We embrace this darkness. Darkness in magic, mystery and history. The world sees Africa as poor. We seek to entice the world to its alluring richness. Richness in culture, energy and resource. The world sees Africa as wanting. All we see is its luscious abundance. Abundance in heritage, contrast and flavour. Africa is the root of mankind and thus of its creativity. Rooted in tradition and bombarded by international influence. Using traditional ritual and modern technique Mootee draws inspiration from this root.
Forget what you think you know about Africa!

Team Mootee
